STAMULI STUDIO

Stamuli AB is a design studio made of a collective of creative and technical people. We mostly work on architecture of interiors and furniture design. Even if many of our projects are in the fashion and retail area, we design quite few very exclusive residential projects.

We love rationalism and we always try to conceptualize decorations in our projects. Color plays often an important role in our design. Our expertise focus on materiality with an eye on sustainability and how to use materials of the future. We have a great knowledge of recycled materials, and we care to develop project with low impact on the environment in terms of production and logistics.

TAGADÀ COLLECTION

Tagadà Collection is a newly developed series of element. This family of furniture includes a chair, two tables (oval and round), a mirror and a carpet.

This collection is the outcome of our studio DNA: a matrix of rationalism and playfulness, minimalism and irony. Shapes, proportions and colors come together in iconic designed pieces.

The elements of this collection have been thought as primary objects able to redefine the environment where they are placed. The name Tagadà is referred to a very common Italian amusement ride in the so called Luna Park, where the city was transformed into an exciting entertaining village for a while.

The materials used to create Tagadà collection are mostly colors. The goal for these objects is to be perceived as pure colors, so to create a dissonance with the low tones of a domestic environment and to give the user the opportunity of an escape from the ordinary.

TAGADÀ COLLECTION 2022

As per the studio's signature, a mix of rationalism and playfulness defines the original design of this extension of the Tagadà Collection.

Tagadà armchair are shaped like stacked boxes, with a relaxed tailored finish and contrasting stitching. The distinctive backrest pillows take the look to a surrealistic level. With colors as leading characters, materials and finishing, now glossy or matt, furry or suede, enlarge the expressivity and sophistication of the collection.
